

ABSTRACT OF THE DISCLOSURE

A long-term urine-collection kit has a large-capacity can having a wide mouth, a small-capacity cup having a rim dimensioned to sit in the mouth, and a removable cover fittable over the mouth of the can when the cup is sitting in the mouth. The capacity of the can is enough, e.g. 2-3 l, to hold a day's urine, and the capacity of the cup is enough, e.g. 400-500 ml, to hold a single urination.
